EDUCATION

MJP Rohilkhand University **Bareilly, Uttar Pradesh**
B. Tech in Electronics and Communication *Expected Graduation, May 2026*
CGPA: 6.52

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), C++, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Frontend:** React.js, Tailwind CSS, Redux Toolkit
- **Databases:** MongoDB (Mongoose), SQL (PostgreSQL)
- **Tools:** Git, GitHub, Postman, Bruno, VS Code

PROJECTS

POS Master – Restaurant Management System (Link)

Tech Stack: *React, Node.js, Express, MongoDB, TanStack Query, Redux Toolkit, Payment Integration*

- **Architected** a full-stack, real-time Point of Sale (POS) system designed to manage dynamic table orders and inventory for **dine-in restaurant** environments.
- **Engineered** a performance-optimized backend utilizing the **MongoDB.lean() method** to significantly reduce object hydration overhead, improving API query speeds and data delivery efficiency by **~35%**.
- Pioneered a modern frontend state management strategy using **Redux Toolkit** combined with **TanStack Query** for efficient server-side data fetching, ensuring near real-time synchronization.
- **Implemented** mission-critical RESTful APIs for tracking, dynamic order generation, and secure **third-party payment integration**, ensuring high data integrity across concurrent user transactions.

OrganizeIt – Task Management System (Link)

Tech Stack: *Node.js, Express, MongoDB, React, Tailwind*

- **Architected** robust **RESTful APIs** backend using Node.js/Express to handle CRUD operations and priority sorting, achieving **~200ms average response time** for critical requests.
- Pioneered a secure authentication and authorization flow utilizing **JSON Web Tokens (JWT)** and **bcrypt.js**, protecting API endpoints from unauthorized access.
- Developed a highly responsive and intuitive UI with **React** and **Tailwind CSS**, optimizing page load time and ensuring seamless UX across mobile and desktop devices.
- **Modelled relational data** using **Mongoose**, designing optimized schemas for Users and Tasks with foreign key referencing (ObjectIDs), improving data retrieval efficiency by **~25%**.

COURSEWORK

Object Oriented Programming
Embedded System
Analog & Digital Communication
Computer Networks
Internet of Things (IoT)
Mobile Communication

PROBLEM SOLVING

- **Problem Solving:** Solved 250+ DSA problem on LeetCode and 250+ on GeeksForGeeks.
- **PoR:** Coordinator at Elcom Bits Club, executed the annual Robo Race and workshops for 2 years.
- **Athletics:** Won 1st price in Kabaddi in inter-college games while playing for campus Kabaddi team.
